TECHNOLOGY CENTER 2800

- sub 307  
AI
1. (Amended) An electro-optical device comprising:
- a first substrate having an insulating surface;
  - a second substrate opposing said first substrate;
  - at least one thin film transistor formed on said insulating surface, said thin film transistor comprising source, drain and channel regions;
  - an interlayer insulating film comprising an inorganic material formed on said thin film transistor;
